Practical Ethical Hacking
TCM Security

Cybersecurity Roles, Processes & Operating System Security
IBM, Coursera

Introduction to Cybersecurity Tools & Cyber Attacks
IBM, Coursera

C++ For C Programmers, Part A
Coursera

PERSONAL PROJECTS

Invictus - Python (Django)
- It connects with developers all around the world
- Shows each developers profile with the relevant skills and project they have worked on
- People can connect with them by sending messages to the developer

Blog Site - Python (Django)
- A Personal Blog Website made using Django.
- Added a feature of read later so that we can add some blogs to our read later section using django sessions.

Vcafe - Python (Django)
- The main purpose behind Vcafe was to automate the existing manual system of our college canteen.
- It would also provide time slots for different orders & thus would prove effective during covid crisis where social distancing is must.

OneTap Essentials - Java & mySql
- A desktop application build primarily for societies to avail various Essential Service required in day to day life.
- This project would also help small businesses to register themselves & get listed to increase customers.

ACHIEVEMENTS

Hacker Of The Month (Top 50 - India), TryHackMe

Holding 1100 rank on TryHackMe
Profile - https://tryhackme.com/p/mr.cryp70
